

An unusual development of the classic mosaic tile: the Cube collection is a mosaic project developed by subtracting material. The collection is a study of three-dimensionality, with tiles hollowed out or featuring shapes in relief, using different thicknesses to create light and shadow, playing with the hues of a neutral colour palette.

CUBE is made of resin marble.

CUBE is manufactured in production sites that are certified with Environmental Management Systems ISO 14001:2004 (internationally recognized standard) and EMAS (European regulation - EC Reg 1221/09).
